

WILL APPRAISE GAS AND ELECTRIC PLANT

The state utilities commission has appointed the consulting engineering firm of Hagenah & Erickson, Chicago, as appraisers to represent the commission in a valuation of the entire plant and properties of the Memphis Gas and Electric company. Chairman Enlow of the commission notified L. P. Miles Saturday of the appointment. The firm was recommended by the United States Interstate commerce commission. Rose W. Harris, electrical engineer, making a traffic survey of the Memphis street railway, said Saturday that he worked with both of them when he was connected with the railroad commission of Wisconsin. Mr. Erickson was at that time a member of the commission and Mr. Hagenah was the chief statistician. The appraisal was ordered by the state commission when the company was allowed on April 1 to increase the price of gas. The increase is to be considered after the appraisal has been made. Mayor Payne and the city commission will probably also have a say in the matter. That will be decided in a few days. If the city names a representative, the gas and electric company will probably also have a representative. If the city officials decide not to appoint an expert, the company will probably not name one.

Sues For \$7,848 After Mill Deal

W. D. Eddins filed suit for \$7,848 against Charles F. Banks in circuit court Saturday. He seeks to recover on the purchase from the defendant of the Mansfield roller mill located at Mansfield, Sebastian county, Ark. Eddins alleges in his first count that the defendant had no title or interest in the property at the time of contract to sell other than that she held a promissory note against the mill for \$7,848 for which she had received judgment in chancery court of Greenwood, Sebastian county. He alleges that the mill was ordered sold by the court and that she bought it in, but the commissioner who made the sale filed a report but his deed was not executed for the defendant, and that later six other claims against the mill showed up, totaling about \$2,000 and that he was forced to pay an attorney and to go to great expense to protect himself and his property to get a deed. There are four counts to the declaration.

Trouble in Mexico.

No trouble in Memphis as long as the men folks can get plenty of Samelson's good Flor De Ma-Cigars. adv.

SUES FOR \$5,000.

Mary L. Gregory filed suit for \$5,000 damages against the Bry-Block Mercantile company in circuit court Saturday morning. She alleges that while she was injured when a Bry's truck hit her car as she was driving it out of her garage on Manassas street on April 26, 1920.

BARRASSO MAKES BOND.

Bond for \$10,000 for Albert Barrasso, youth arrested for alleged connection with the criminal assault of a young girl was made Saturday. His bondsmen are Louis and James V. Barrasso, his brothers, and Harry Cohn.

ESSEX MOTOR CARS
Do You Know the Secret of Essex Leadership?
It Is the New Light Type With Big Car Ability. Can Any Light Car Rival Its Speed, Power or Endurance?

Lightness today is an overwhelming advantage in a motor car, provided it means no forfeit of fine performance, endurance or distinctive appearance.

Yet, prior to the Essex, what car combined all these qualities? There were light cars to be sure. But none to meet the requirements of those who exact the highest standards of ability, comfort and good looks.

Had such a type existed, Essex could not have won such swift dominance. It could have set no world's selling record as it did, with a greater total paid for Essex than for any car ever brought out in its first year.

The very suddenness of its success shows how its qualities commanded attention. For men are not quick to buy a car that time has not proved.

And the Essex came unknown. Merit was its only advocate for recognition. Its quality was instantly obvious. In looks, in action, its appeal was dynamic. And it drew immediate response from all classes of motor users.

Almost Doubles
Light Car Endurance

They found ability, speed and power before believed impossible in a light car.

Now see how Essex has justified all the fine things that have been said in its praise.

An Essex stock chassis set the official world's 50-hour endurance record of 3,037 miles. In three tests it traveled 5,870 miles, averaging above a mile a minute. An Essex stock touring car also holds the world's 24-hour road record of 1,061 miles.

To those who had owned light cars, the Essex was a revelation. It gave them a new sensation of stability and power. They found charm of appearance, riding ease and pride of ownership that comes from possession of a car they know none can surpass in performance.

The Dominant Light Car
By Official Proof

People accustomed to fine car qualities recognize in the light Essex all the performance, comfort and good looks that formerly were regarded exclusive to large, costly cars.

And with it Essex brings every advantage of the light type. These compel consideration. They consist not only of important economies, but of greater handling ease, safety and convenience. Parking for large cars is becoming an increasingly difficult problem. So, too, is their manipulation in heavy traffic. The light car clearly shows its value in greater nimbleness. The common sense facts prove it from every angle, the type for all-round usefulness.

When you know the appeal of the Essex you will scarcely be content to drive another car.
